EDUCATION

The George Washington University

Master of Science in Computer Science — GPA: 3.79/4.00

Washington, DC

Aug 2025 - May 2026

The George Washington University

Bachelor of Science in Computer Science — GPA: 3.44/4.00

Washington, DC

Aug 2021 - May 2025

PROJECTS

Raytheon-Sponsored Drone Competition — Capstone Project

Sep. 2024 – April 2025

- Finished in 4th place and won the Most Innovative Design Award for our Lissajous drone search pattern
- Collaborated with an interdisciplinary team of electrical/mechanical engineers and computer scientists, working directly alongside a Raytheon Innovation Business Alignment Lead, to design a two-drone system for a simulated search-and-rescue mission requiring autonomous flight, drone-to-drone communication, and package delivery to randomized coordinates
- Engineered dual-mode drone-to-drone communication to ensure a reliable exchange of navigation and vision data between the scout and delivery UAVs: Java socket-based client/server protocol for Gazebo simulation testing and serial telemetry radios for live hardware and competition use
- Coordinated task ownership across multiple teams to prevent duplicated effort and keep product development on schedule

EXPERIENCE

Mathematics Instructor

Feb. 2025 – Jul. 2026

Mathnasium

Washington, DC

- Delivered individualized math instruction to 20-25 K-12 students daily, adapting teaching methods to match various skill levels and learning styles
- Diagnosed individual skill gaps using Mathnasium's curriculum as a framework, tailoring lesson plans towards improving student comprehension and test confidence

Learning Assistant

Sep. 2023 – Dec. 2024

The George Washington University

Washington, DC

- Mentored a class of 70+ students by reinforcing concepts and resolving questions regarding introductory data structures, discrete mathematics, and number theory while leading in-class activities and weekly office hours to ensure progress with student's understanding
- Structured and updated the course website weekly adding the most recent course lecture notes, slides, code examples, and homework to ensure student access

Research Assistant

May 2023 – Nov. 2023

The George Washington University

Washington, DC

- Built an asynchronous HCI course website consisting of 14 interactive learning modules each with JavaScript/html tutorials, voice recorded guides and programming exercises tailored to front-end development
- Led weekly stakeholder meetings to ensure that the website met the course standards and requirements ahead of each module release
- Converted Java course assignments into Python and enhanced the functionality of a graph plotting software called Plottool used specifically for undergraduate data visualization projects

AI/ML Intern

May 2022 – Aug. 2022

DAIM Research

Seocho, Seoul, South Korea

- Engineered a path-finding algorithm for autonomous manufacturing robotics used in industrial smart factories
- Translated the company's website from Korean to English and compiled a research database of AI companies to support business development efforts

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, Julia, C, Assembly, SQL

Frameworks & Technologies: React, AWS, Flask, Linux, GitHub, Excel

Security Tools: Metasploit, Wireshark, Snort, OVAL

Certifications: AWS Cloud Security Builder
